

North Wolds Federation Intent Statement

Design and Technology

Our intent is for all of our children to be inspired by design in the real world; for example famous bridges, buildings, fashion and food. Teachers' present children with contextualised scenarios allowing them to think about design to create solutions to a range of challenges or problems. These opportunities are adapted to meet the needs of individual abilities. Our ambitious planning will develop age appropriate skills, knowledge and vocabulary that build upon the previous learning. All children from Year One to Year Six, will be taught specific and useful design technology skills and access opportunities to develop and refine their problem solving skills in the subject. The broad and balanced curriculum will ensure children leave our school equipped to realise their potential in design and making products they can be proud of.

Market Rasen C of E Primary School, one of the schools in our Federation, is a proud Church School. The aspects of the [Church School Vision](#) that relate to our intent in Design and Technology include:

- **“We educate each person” & “Our inclusive school community”**; all children will access the Design and Technology curriculum.
- **“Respecting individual differences”**; adjustments will be made for children that need them when learning this subject. This could be to support with creativity, fine motor skills or support using the resources and tools to create their pieces.
- Help children to be **“Spiritually aware”** when they design and create. More information about this can be found in the Spirituality Policy.
- **“Start children off on the way they should go”**; we are preparing for children to be lifelong designers and creators and have a love and appreciation for creating and creativity.
- To help children achieve their **“Dreams and goals”** if they believe their future lies within this subject area in further education, the workplace, a hobby or an even an interest.
