

North Wolds Federation Intent Statement

Mathematics

It is the intention of the North Wolds Federation that all children will leave their Primary education as confident and flexible mathematicians, able to apply their knowledge and skills in a wide range of real world contexts. We aim to foster an enjoyment and true mastery of the subject, whilst developing fluency with key facts and the ability to solve complex problems and reason about number. Enriching and aspirational tasks will ensure the development of resilient learners who relish a challenge. Learning opportunities will be carefully crafted to enable children to make connections between mathematical concepts and their work in the wider curriculum and beyond. Staff will clearly communicate an enthusiasm of the subject to ensure children have a positive view of mathematics and their own ability in the subject.

Market Rasen C of E Primary School, one of the schools in our Federation, is a proud Church School. The aspects of the [Church School Vision](#) that relate to the intent in our Mathematics curriculum include:

- **“We educate each person” & “Our inclusive school community”**; all children will access the Maths curriculum. We know that the ability to be numerate will have a huge impact on children’s life chances and therefore their **“Dreams and goals.”**
- **“Respecting individual differences”**; significant adjustments will be made for children that need them when learning to read. This could be overlearning, intervention, scaffolding or additional adult support.
- **“Start children off on the way they should go”**; we are preparing for children to have a lifelong love of Maths and for Maths not to be a barrier to success therefore **“Preparing for a brighter tomorrow.”**
